Semiconductor Detector Systems

Helmuth Spieler

Physics Division, Lawrence Berkeley National Laboratory

CONTENTS

1	Det	ector systems overview	1		
	1.1	Sensor	2		
	1.2	Preamplifier	3		
	1.3	Pulse shaper	3		
	1.4	Digitizer	5		
	1.5	Electro-mechanical integration	6		
	1.6	Sensor structures I	8		
		1.6.1 Basic sensor	8		
		1.6.2 Position sensing	9		
		1.6.3 Pixel devices	11		
	1.7	Sensor physics	12		
		1.7.1 Signal charge	12		
		1.7.2 Sensor volume	13		
		1.7.3 Charge collection	16		
		1.7.4 Energy resolution	19		
		1.7.5 Position resolution	19		
	1.8	Sensor structures II – monolithic pixel devices	24		
		1.8.1 Charge coupled devices	24		
		1.8.2 Silicon drift chambers	25		
		1.8.3 Monolithic active pixel sensors	26		
	1.9	Electronics	29		
	1.10	Detection limits and resolution	29		
		1.10.1 Electronic noise	31		
		1.10.2 Amplitude measurements	33		
		1.10.3 Timing measurements	35		
	1.11	Subsystems	36		
		1.11.1 Circuit integration and bussing	36		
		1.11.2 Detector modules, services, and supports	3 8		
		1.11.3 Data acquisition	40		
	1.12	Further reading	40		
	Refe	rences	40		
2	Signal formation and acquisition				
	$2.\overline{1}$	The signal	43		
	2.2	Detector sensitivity	48		
		2.2.1 Low energy quanta $(E \approx E_g)$	48		
		2.2.2 High energy quanta $(E \gg E_q)$	51		
		2.2.3 Fluctuations in signal charge – the Fano factor	52		
	2.3	Signal formation	55		
		2.3.1 Formation of a high-field region	55		

 \mathbf{x}

		2.3.2 Doping	56		
		2.3.3 The pn-junction	59		
		2.3.4 The reverse-biased diode	61		
		2.3.5 Strip and pixel detectors	66		
	2.4	Charge collection	67		
	2.5	Time dependence of the signal current	71		
		2.5.1 Induced charge – Ramo's theorem	73		
		2.5.2 Parallel plate geometry with uniform field	75		
		2.5.3 Double-sided strip detector	78		
	2.6	Charge collection in the presence of trapping	82 83		
	2.7				
	2.8				
	2.9	Signal acquisition	91		
		2.9.1 Voltage-sensitive amplifier	91		
		2.9.2 Current-sensitive amplifier	91		
		2.9.3 Voltage and current mode with capacitive sources	92		
		2.9.4 Feedback amplifiers – the "charge-sensitive amplifier"	93		
		2.9.5 Realistic charge-sensitive amplifiers	95		
		2.9.6 Input impedance of a charge-sensitive amplifier	100		
	Refe	erences	102		
3	Electronic noise				
	3.1	Electronic noise and resolution	105		
	3.2	Electronic noise	107		
	3.3	Some general properties of noise	107		
		3.3.1 Thermal (Johnson) noise	109		
		3.3.2 Shot noise	109		
		3.3.3 Low frequency (" $1/f$ ") noise	109		
	3.4	Derivation of spectral densities	110		
		3.4.1 Spectral density of thermal noise	110		
		3.4.2 Spectral density of shot noise	111		
		3.4.3 Spectral density of low-frequency noise	113		
	3.5	"Noiseless" resistances	114		
		3.5.1 Dynamic resistances	114		
		3.5.2 Active resistances	114		
		3.5.3 Radiation resistance of an antenna	114		
	3.6	Correlated noise	115		
	3.7	Signal equivalent noise measures	116		
		3.7.1 Noise equivalent power	116		
		3.7.2 Equivalent noise charge	116		
	3.8	Noise in Amplifiers	117		
		3.8.1 Amplifier noise model	117		
		3.8.2 Noise bandwidth vs. signal bandwidth	120		
	3.9	Amplifier noise matching	121
